

calgodip D 5000

Teat dip and care product with iodine

- ready to use
- film forming
- with skin care agents
- protects and conditions

General Description:

calgodip D 5000 is a iodine containing, ready-to-use teat dip and care preparation suitable for application after milking. The product closes the teat canal, forms a drip free barrier film and protects it against invasion of bacteria.

calgodip D 5000 contains effective skin care agents which regularly used reduce chapping and provide for smooth skin and excellent udder condition.

calgodip D 5000 interrupts germ transfer and ensures good udder health.

Application:

Apply as concentrate immediately after each milking using proper dip beaker

Special instruction:

Close container thoroughly after use.

Do not return used solution into the original container.

Thoroughly clean out dip beaker before reusing it.

Store cool but prevent from freezing (optimum +5C to 25°C)

Physical and chemical properties:

Appearance: brownish, clear liquid

Odour: faintly of iodine

Density: 1,04 g/cm³

pH-value (Conc.) 4,7 to 5,9

Composition: Iodine (5g/kg), glycerine, surfactants, film forming agents.

For health and safety information, refer to the Safety Data Sheet (SDS) for this product.
